HEDS-8949 Alignment Kit for AEAT-9000 Optical Encoder

[All Detail](#) | [Applications](#)

Description

HEDS-8949, optical encoder alignment kit, features real-time IC monitoring to allow user monitor the IC output during alignment. The alignment kit consists of the IC interface hardware, supported by a PC application. The IC interface hardware is a microcontroller system that links up AEAT9000 encoder with the PC through a USB cable

Features

- [Bus-powered USB device](#)
- [Real-time monitoring of LocTest and TiltOut output](#)
- [Real-time monitoring AB Incremental signal pairs or Sine/Cosine signal pairs.](#)
- [Real-time monitoring of SSI data.](#)
- [Data capturing rate at 4000samples per second](#)

Applications

- [AEAT-9000 alignment purpose](#)
- [AEAT-9000 signal monitoring](#)
