

Dura-Con connectors

Metal Shell D Microminiature Environmental Connectors

Every passing year brings technological advances as industry demands more complex electronic packaging. Cinch's Dura-Con Metal Shell D Microminiature Connectors are designed to meet these stringent requirements in aircraft, data processing equipment, spacecraft and other critical applications.

Years of research and development have resulted in a series of durable,

high quality connectors of small size and light weight. These high density, environmental microminiature connectors are available in 8 shell sizes accommodating 9 to 100 Twist-pin 24 size contacts arranged on .050-inch centers. Special power arrangements and custom terminations can be specified also.

Dura-Con Metal Shell D connectors are constructed of rugged aluminum to give an extra strength, prevent chipping, cracking or breaking, even under severe mishandling and abuse. Mating is accomplished by friction or jack screws. These shells also provide electromagnetic (EMI) shielding (40 db attenuation at 100 MHz in mated condition) and RFI shielding.

Connector contacts are effectively sealed off from moisture and humidity as well as from each other and their shell by a silicone elastomer compression interfacial seal. The rear connector seal is of epoxy potting and passes the 10-day MIL-STD-202, Method 106 humidity cycle.

The Dura-Con Metal Shell D Microminiature Connector has proved itself to be strong, durable and reliable in thousands of field applications. They can be manufactured in production quantities in all 8 contact configurations, as well as in varying shapes for special applications.

Metal Shell D Microminiature Environmental Connectors meets the requirements of MIL-C-83513.

Performance Data

Electrical

Contact Resistance: When measured in accordance with MIL-C-83513, allowable contact resistance measured on the wire at the rear of the connector is 8 milliohms maximum.

Current Rating: 3 amps max.

Max. Voltage Drop: 24 millivolts at 3 amps.

Dielectric Withstanding Voltage: Sea Level—600VAC; 70,000 ft. — 150VAC.

Insulation Resistance: 5000 megohms min.

Mechanical

Engaging and Separating Force: For an individual contact the maximum engaging force is 6 ounces. Minimum separating force is 0.5 ounces per contact.

Mating and Unmating Force: Mating: 10 ounces times the number of contacts. Unmating: 0.5 ounces minimum times number of contacts.

Environmental

With compressed silicone elastomer interfacial seal to provide a complete moisture and humidity seal between each contact and between contacts and shell.

Vibration: Tested in accordance with MIL-STD-1344, Method 2005, Test Condition IV with no discontinuity in excess of one (1) microsecond.

Shock: Tested in accordance with MIL-STD-1344, Method 2004, Test Condition E, with no discontinuity in excess of one (1) microsecond.

Corrosion Resistance: No damage or unacceptable increase in contact resistance after mated sample subjected to 48 hours of salt spray per MIL-STD-202, Method 101D, 5% solution, Condition B.

Temperature Range: -55°C to +135°C.

Durability: No mechanical or electrical defects after 500 cycles at a rate of 600 cycles per hour.

Moisture Resistance: Tested in accordance with MIL-STD-1344, Method 1002, omit 7a and b. After testing, the insulation resistance is greater than 1,000 megohms.

Standard Materials and Finishes

Shell: Aluminum alloy, cadmium plated, yellow chromate, or electroless nickel plated.

Insulator: Glass filled thermoplastic, polyester 94 V-O or thermoset diallyl phthalate.

Contacts: Pin and socket contact—copper alloy .000050 gold plated.

Interfacial Seal: Silicone Elastomer. (Fluorosilicone Available)

Mechanical Features:

Sizes: 8 sizes: 9, 15, 21, 25, 31, 37, 51, and 100.

Service Classes: Environmental.

Polarization: Keystone-shaped shells.

Contact Spacing Centers: 0.050".

Shell Styles: Plug and receptacle.

How to Order

Cinch Dura-Con D Connector Insulator Type
C = Diallyl Phthalate Glass Reinforced
D = Thermoplastic Glass Reinforced

Mounting Type
M = Screw Mount Metal Shell

No. of Contacts
 9, 15, 21, 25, 31, 37, 51, 100

Contact Type
P — Pin (Plug)
S — Socket (Receptacle)

Wire Size in AWG
 4 = 24, 5 = 25, 6 = 26, 8 = 28,
 0 = 30 or S = Solder Cup
 Stranded wire available in even number sizes only.

Wire Type
 Stranded or solid wire
C = Solid Copper
D = Solid Dumet
E = MIL-W-16878/4, 7 Strand
F = MIL-W-16878/6, 7 Strand
G = MIL-W-16878/4, 19 Strand
H = MIL-W-16878/6, 19 Strand
J = Solid Insulated Wire
K = Insulated Wire Per MIL-W-22759/11
L = Insulated Wire Per MIL-W-22759/19

Termination, Color or Finish
1 = White
2 = Yellow
3 = Tin Plated
4 = Gold Plated
5 = Color Coded Per MIL-Std. 681, System 1.

Lead Length in Inches XX.X

No Letter = Std. Yellow Chromate over Cadmium
N = Electroless Nickel

Mounting Types
B = No Hardware
F = Float Mount
R = Reverse Float Mount
K = Jackscrew (Standard)
D = Jackscrew (Short Neck Style)
L = Jackscrew (Low Profile)
Q = Screwlock
P = Jackpost, Size 9 Thru 51 MIL-C-83513/5-07
 Size 100 MIL-C-83513/5-17
