UHF Planar Antenna

SPSPRDA2-P

The SPSPRDA2−P is an indoor, planar antenna optimized for use with Smart Passive Sensors™. This planar style antenna comes with a RP−SMA jack connector, enabling fast installation times. This antenna is designed to be placed on metal surfaces, making it ideal for applications such as datacenter management and industrial predictive maintenance where other antenna topologies may not be ideal.

This planar antenna functions in both the ETSI (865−868MHz) and FCC (902−928MHz) defined UHF bands. The free−space radiation pattern when mounted on a metal plane will be an off−axis toroid, some placement optimization may be required based on application environment.
